The Super Sorter Management Advantage

Super Sorter

Easy, efficient sorting with
superior control functions

Sorter features and benefits:

- Reduce labor and increase efficiencies
- Pigs line up to go through sorter
- Manage the feeding of pigs
- Get pigs to market uniformly
- Mark pigs at any sort level with different color combinations
- HerdStar® patented ESP (Electronic Sense of Position) – no troublesome gate triggers or electronic eyes
- Open frame design speeds training and reduces stress

HerdStar control system:

- Easy operation
- Monitor daily rates of gain
- ID pigs electronically
- Manage data to more accurately forecast when pigs will be ready for market
- Six sort modes: Simple, Train, Light, Sell, Feed and RFID
- Monitor multiple scales, multiple sites with HerdStar's web-based eHerdsman program

Super Sorter

2-Way and 3-Way Systems

One-way Gate

(option shown at left)

The One-Way Gate Standoff eliminates pigs from blocking the front of the scale which can tie up sorting efficiency.

Weanling Sorter Cage Insert

This option provides an effective way to accurately weigh pigs in the 40 to 80 lb. range.
